EDUCATION

2022 - 2026 **Thapar Institute of Engineering and Technology** B.E. Electronics and Computers
2020 - 2022 XII CBSE : Higher Secondary Education : 80% X ICSE : Secondary Education : 95.6%

SKILLS

Languages Python, C++, JavaScript, TypeScript, SQL, Java
Backend Django, Flask, FastAPI, React, Node.js, Spring Boot, Server-Sent Events, API Design
AI / ML PyTorch, Hugging Face, Transformers, NumPy, Pandas, FAISS, LangChain, RAG, NLP, LLMs
Databases PostgreSQL, MySQL, SQLite, MongoDB, Redis, Indexing, Query Optimization, Caching
Concepts Object-Oriented Programming, Distributed Systems, Microservices, Multithreading, Software Design Patterns, Docker, Docker Compose, Git, GitHub Actions, Linux, Nginx, CI/CD

WORK EXPERIENCE

Google Summer of Code (GSoC) Contributor | FOSSASIA May 2026 - present

- Built a **real-time AI interpretation** plugin for Eventyay, supporting **2** multilingual interpretation backends.
- Implemented **JWT authentication**, to allow one login for independent event rooms; added pytest tests.
- Achieved **6 REST APIs** and **SSE** captions with **Daphne**, supporting **20** languages for per-room streams.
- Improved Translator, reducing **ASR's** caption latency by **200 ms** using **CTranslate2** and **WebSockets**.

Software Developer Intern | Devanant Jun 2024 - Jul 2024

- Developed **MERN** applications using **MongoDB**, **Express.js**, **Node.js**, supporting **50+** concurrent users.
- Reduced API calls by **30%** through React **debouncing** and optimized MongoDB query time by **40%**.
- Owned 1 module through production, implementing **CI/CD pipelines** for automated builds and tests.

PROJECTS

SmartInventory : Inventory Management Backend [Project Link](#)

- Wrote **13 REST endpoints** using **Spring Boot**, MySQL for product, category, and inventory management.
- Implemented stock IN/OUT tracking across **4 MySQL tables**, cutting update errors by **25%** in testing.
- Added DTO validation, pagination, **Swagger**, **Docker**, and exceptions, cutting debugging time by **30%**.

PolicyAI : Insurance Policy Analyzer (RAG + LLM) [Project Link](#)

- **Fine-tuned Phi-3.5** with **LoRA/QLoRA**, achieving **88% precision** and **84% F1** on clause classification.
- Created a **FAISS RAG** pipeline for insurance PDFs, achieving **100% clause retrieval accuracy** overall.
- Processed policy PDFs with chunking, transformers and embeddings, cutting ingestion time by **35%**.
- Designed a Streamlit UI delivering clause answers with **1.6s average latency** during local tests.

Gas Price Optimization : LSTM + Smart Contracts [Project Link](#)

- Trained an **LSTM** on **24-step sequences**, achieving **12% MAPE** for Ethereum gas-price prediction.
- Integrated Blocknative gas feeds with Web3.py for real-time Ethereum gas-price monitoring.
- Automated Sepolia contract execution using gas thresholds, achieving **93% gas-prediction accuracy**.

ACHIEVEMENTS & LEADERSHIP

- Open source contributor: Merged **50+ PRs** across various projects. [Github](#) Oct 2022 - Present
- CA, Techfest'25, IIT Bombay; **Top 200** in 2,500+ college network. [Merit](#) July - Dec 2025
- **Top 30 Team**, MLSC Makeathon 5.0: among 1,000+ participants. [Merit](#) Feb 2023
- Core Team Member, Stress to Smile: Organized **30+ workshops** for 500+ students. Nov 2024
